

## React-JS (Front-end) coding challenge

Create a multi-select custom dropdown component as shown in the table below.  
Please don't use external libraries.

### Basic Requirements:

- Values are multi-select.
- When "Others" is selected show an additional input field below.
- Disable the **SAVE** button when "Others" is selected and the input field is blank.
- Dropdown menu closes when the **SAVE** button is pressed or on outside click.
- Component should accept a default value when no value(s) selected i.e. "No Preferences".
- When multiple values are selected, show them as comma separated string in the select box i.e. "English, Mandarin, Others: Vietnamese". Truncate longer text with ...
- Write well optimised JS & CSS for this challenge.

	<h3>Pro Challenge:</h3> <ul style="list-style-type: none"><li>• Add animations for arrow and dropdown menu.</li><li>• Dropdown menu should open below by default. In case there isn't enough space it should appear on top, as shown in the picture.</li><li>• Able to handle a long list of items.</li><li>• Dropdown component should be production ready.</li></ul>
